

DATA SHEET – A GRADE RUBBER

CHARACTERISTICS

POLYMER MATRIX: Rubber waste blends natural and synthetic

PRESENTATION: sheets

DENSITY: 1.12 ± 1.20 g/cm³

HARDNESS: 50 ± 70 SHORE

ABRASION RESISTANCE: 100 ± 200 mm³

ELONGATION: 500-640%

TENSILE STRENGTH: 17-22 MPa

COLOUR: Black

FORCE: 20 – 35 max

PACKAGING: On plastic pallets / metal boxes / cardboxes

QUNATITY PER CONTAINER: 40 HC: 18 to 24 tons

STORAGE METHOD: Store in a dry and cool place, sheltered from the light and at a temperature higher than 20 ° c. During the loading and / or unloading operations by transport halves, it is recommended to take any precaution to avoid that the material remains exposed to the sun and bad weather for a long time.

USABILITY: 100% usable

REPROCESS: This product doesn't need to be reprocessed.
